Semiannual Regulatory Agenda

FEDERAL COMMUNICATIONS COMMISSION (FCC)

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Ch. I

Unified Agenda of Federal Regulations; April 1996

AGENCY: Federal Communications Commission.

ACTION: Semiannual regulatory agenda.

SUMMARY: Twice a year, the Commission publishes a list in the Unified Agenda of those major items and other significant proceedings under development or review that pertain to the Regulatory Flexibility Act. The Agenda also provides the CFR citations and legal authorities which govern these proceedings. The Regulatory Flexibility Act (94 Stat. 1167; 5 U.S.C. 605) includes notations on the applicability of the Regulatory Flexibility Act to each item. The Unified Agenda will be published in the Federal Register in April and October of each year.

ADDRESSES: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Nancy Camp, Office of Managing Director, (202) 418-0442.

SUPPLEMENTARY INFORMATION:

Unified Agenda of Major and Other Significant Proceedings

The Commission encourages public participation in the FCC rulemaking process. To help keep the public informed of significant rulemaking proceedings, the Commission has prepared an agenda of important proceedings now in progress. OMB will publish the Unified Agenda in the Federal Register in April and October of each year.

The following terms may be helpful in understanding the status of the proceedings included in this report:

Docket Number - assigned to a proceeding if the Commission has issued either a Notice of Proposed Rulemaking or a Notice of Inquiry concerning the matter under consideration. The Commission has used docket numbers since January 1, 1978. Docket numbers consist of the last two digits of the calendar year in which the docket was established, plus a sequential number, which begins at 1 with the first docket initiated during a calendar year (e.g., Docket 80-1 or Docket 83-1). The abbreviation for the responsible Bureau usually precedes the docket number, as in "MM Docket 79-164," which indicates that the responsible Bureau is the Mass Media Bureau. A docket number consisting of only five digits (e.g., Docket 29622) indicates that the docket was established before January 1, 1978.

Notice of Inquiry (NOI) - issued by the Commission when it is seeking

information on a broad subject or trying to generate ideas on a given topic. A comment period is specified during which all interested parties may submit comments.

Further Notice of Inquiry (FNOI)

Notice of Proposed Rulemaking (NPRM) - issued by the Commission when it is proposing a specific change to the FCC Rules and Regulations. Before any changes are actually made, interested parties may submit written comments on the proposals.

Further Notice of Proposed Rulemaking (FNPRM)

Memorandum Opinion and Order (MO&O) - issued by the Commission to deny a petition for rulemaking, conclude an inquiry, modify a decision, or deny a petition for reconsideration of a decision.

Rulemaking (RM) Number - assigned to a proceeding after the appropriate Bureau/Office has reviewed a petition for rulemaking but before the Commission has taken action on the petition.

Report and Order (R&O) - issued by the Commission to state a new or amended rule or state that the FCC Rules will not be changed.

William F. Caton,
Acting Secretary,
Federal Communications Commission.

47 CFR 69**Legal Deadline:** None**Abstract:** The Commission released a Notice of Proposed Rulemaking seeking comment on proposed changes to the rules governing compensation for calls transferred between LEC and CMRS networks, and proposed that, at least for an interim period, interconnection should be priced on a "bill and keep" basic (i.e., each carrier reciprocally terminates from the other at no charge) with respect to local switching facilities and connections to end users. The Notice also tentatively concluded that

information about LEC-CMRS interconnection arrangements should be made publicly available, and invited parties to comment on whether it should adopt an interconnection model that is not binding on state regulatory commissions, a mandatory model with broad parameters, or specific requirements.

These services, such as integrated services digital network (ISDN) service, permit customers to obtain digital transmission over existing copper wire, through the use of advanced equipment. In addition to obtaining multiple channels over a single local loop or T-1 facility, these services can transmit data at higher speeds and with greater accuracy. Also on May 30, 1995, the Common Carrier Bureau released a Public Notice stating that, pending Commission action in the rulemaking, the Bureau generally would not initiate enforcement action against LECs that are not complying with existing Commission rules regarding the application of SLCs to ISDN service.**Timetable:**

GREAT LAKES AGREEMENT SHIPS**

Priority: Substantive, Nonsignificant

Reinventing Government: This

Legal Authority: 47 USC 154(i); 47 USC
303(r)

CFR Citation: 47 CFR 80; 47 CFR 0.311

Legal Deadline: None

Abstract: The FCC proposes to amend
its rules to allow owners and operators
of ships subject to the annual
inspection requirements of the
Agreement between the United States
and Canada for the Promotion of Safety
on the Great Lakes by means of Radio
(Great Lakes Agreement) to have the
inspection performed by a private
sector classification society instead of
by Commission staff. The proposed
changes would reduce economic
burdens on the public and the
Commission by allowing mariners to
arrange for inspections at their
convenience. The FCC also proposes a
joint maritime safety study to be
conducted with the U.S. and Canadian
Coast Guards. Comments are also
sought regarding whether other
designated private sector entities or
persons should be permitted to perform
inspections.

It will eliminate existing text in the CFR.**Legal Authority:** 47 USC 154; 47 USC 701 to 744; 47 USC 554; 47 USC 303; 47 USC 4**CFR Citation:** 47 CFR 25**Legal Deadline:** None**Abstract:** The Commission seeks to develop a record and to solicit comments on proposed rules. The proposed rules and policies are designed to streamline application and

licensing requirements for satellite space and earth stations under part 25 of the Commission's rules. The rules proposed waiving the construction permit requirement for satellite space stations and modifying the license term for temporary fixed earth stations and the implementation period for very small aperture terminal earth stations. Also proposed are amendments concerning minor modifications for earth stations, including orbit operations of space stations, and application and licensing terms. The proposed rules also modify basic application requirements for satellite services. The proposed rules are designed to reduce burden by eliminating and streamlining several requirements. In order to be effective, these rules must apply to all licensees

and thus there is no significant alternative.
